... Foreword ...

Feeling the need of closer cooperation in spreading the tidings of the merits of the Reds, Whites and Roans as the real dual purpose cattle for the farmer to own, a group of Shorthorn breeders from Daviess, Martin and Knox Counties met at the home of Dr. W. O. McKittrick, president of the Daviess County Shorthorn Breeders' Association, Dec. 30, 1943 and organized the Daviess-Martin-Knox Tri-County Shorthorn Breeders' Association. Floran D. Myers of Daviess County was selected president and John V. O'Neal of Martin County vice-president. Discussion as to how best to bring before the public the ability of the Shorthorn cattle to make good wherever given the chance, the showing of them by 4-H club boys and girls in the county shows, Gold Medal district and state shows was highly recommended, for by these shows, the well bred Shorthorn proves its ability to make in a short time the kind and quality of beef so badly needed by the world today.

In order for these boys and girls to have the right quality of calves to feed and show, and for those who feed commercial cattle to meet present day needs, there must be more purebred Shorthorns scattered throughout the country.

To help meet this need the breeders of this Association, decided to hold a yearly sale, the first to be held June 1st. Fourteen members of the Association are consigning 50 lots, with which we hope to help found new herds and add to those already started in the Shorthorn breeding business. We feel sure that these cattle will be a help to the cattle industry and we invite you to come and be with us on sale day. Come early in order to attend the show which will be held in connection with the sale.

Emma D. Allison,
Secretary-Treasurer

A Natural Cattle Growing Area

A tour through the counties from which the membership for the Daviess-Martin-Knox Tri-County Shorthorn Breeders' Association is drawn brings one to the immediate conclusion that this section is ideal for cattle production and that Shorthorns are ideal for the purpose. Pastures are perfect, an abundance of feed and roughage is produced, and the very nature of the country calls for a diversified system of farming for which Shorthorns are so well adapted. My visits to the farms of the consignors to this sale revealed the fact that each is using a top herd sire and that each is striving to make constant improvement in his herd. The cattle in this sale are useful, prolific and an unusually large number of females that are close to profit are included in the offering. I congratulate the members of this association for their aggressive effort to extend the usefulness of the breed in this fertile section.
